SUMMARY

This report has been prepared by a group of Azerbaijani human rights defenders regarding the latest status of the human rights violations of the Azerbaijani Turks in Iran by examining the 2022 Iran protests. The Azerbaijani Turks are Iran's most significant ethnic minority group. They primarily reside in the West Azerbaijan, East Azerbaijan, Ardabil, and Zanjan provinces in Iran. These first three provinces share borders with Turkey and the Republic of Azerbaijan. Azerbaijani Turks are also mainly populated in Gilan, Qazvin, Hamadan, Alborz, Kurdistan, and Tehran provinces in Iran.¹

Giving an estimate about the population count of the Azerbaijani Turks in Iran is very challenging as the Iranian government has never released any official demographic statistics for the ethnic and linguistic groups.² However, during his official visit to Turkey in January of 2011, former Iranian Foreign Minister Ali Akbar Salehi declared that forty percent of Iranians speak Turkish:

“We speak almost the same language. Forty percent of Iranians speak Turkish. This is a big link between Turkey and Iran.”

The Azerbaijani Turks, alongside their ethnic relatives such as Turkmens, Qashgais, and other Turkic groups often claim a population share of more than 40%. After the rise of the Pahlavi dynasty to power in Iran in 1925, the government pursued forced assimilation policies. This led to a decline in Azerbaijani influence in the country's government and politics significantly.

The Islamic regime, like the previous monarchy in Iran, has downplayed and willfully ignored the differences between Persians and Azerbaijanis. The Islamic regime did not hesitate to crack down on the Azerbaijani Turk protestors throughout its history, using heavy weapons to crush uprisings such as the protests in Tabriz in 1981 that led to the massacre of hundreds of Azerbaijanis.³

This is applicable to the current protests in Iran as well. Many civilians have been arrested, sentenced to capital punishment, and even killed on the streets by the Iranian security forces. However, considering the preexisting systemic discrimination and racism against the Azerbaijani Turks, the human rights violations against Azerbaijanis have been either ignored or lost through the cracks. The aim of this report is to close the gaps that exist in reporting of these human rights violations by the Islamic Republic of Iran. This report provides an update on the situation of the Azerbaijani Turk protestors who have been arrested, murdered people, and executed by the Iranian regime's forces. The first edition of this report focused on the protests and human right violations from September and October of 2022. This report is the second edition and focuses on the months of November and December of 2022.

The first part of this report presents a brief overview of the latest protests. The second part of this report mainly concentrates on the report's authors and sources that have been used as a reference in preparation. The third part of this report explains the methodology used, the data collection process, and the formation of the framework.

Like other regions of Iran, people in the Azerbaijani-populated provinces began holding demonstrations demanding freedom alongside their other ethnic and religious rights. Authorities started to crack down upon Azerbaijani protests immediately. According to Harana Human Rights Commission, more than 18,000 protestors have been arrested. A considerable share of these arrested protestors are ethnically Azerbaijani Turks. According to the Azerbaijani lawyer Sina Yousefi, the vice-chairman of the Human Rights Commission of the Azerbaijani Lawyers Association, "The number of referrals to colleagues' offices and the lawyers' association to accept the representation of those detained during the protests was very high. Therefore, they decided to form a "defense committee" in the Human Rights Commission. The number of detainees in Tabriz was more than 1700 protestors in the first two weeks of the protests alone."

We were able to confirm the identity of only 24 protestors who were killed as a result of direct shooting, physical abuse, or torture by the various security forces and/or executed by the courts of the Islamic Republic of Iran.

Part A focuses on murdered individuals and we discuss the murder of 24 people by the repressive regime of Iran. We divided this part of the report into two sections. These sections are murdered women & children and other murdered protestors. The first part is in regards to the 13 out of 24 killed people who were children and women. They were killed in a cruel and merciless manner. The second section focuses on the other 10 killed individuals.

Part B is dedicated to the executed individuals by the unjust legal system in Iran. We will specifically focus on the case of a victim named Milad Ashrafi who was executed arbitrarily by the judicial actors. This part also includes 6 other victims who are unfairly sentenced to capital punishment.

In part C, we will examine the cases of 6 Azerbaijani Lawyers who were arrested and sentenced. Most of these lawyers were sentenced to imprisonment as well as a travel ban prohibiting them from exiting the country.

Part D will explore 23 protestors who were arrested by the Iranian security forces. They have been sentenced to various punishments.

Part E will analyze 12 individuals summoned by the ministry of intelligence and provide details on their cases.

In part F, we will talk about arrested people. Throughout the months of September and October, 110 people were arrested. Additionally, 121 other people were arrested in the months of November and December. Most of these individuals were arrested during the uprisings while a few were arrested in the aftermath of these protests.

In part G, we will focus on the cases of 3 people who were suspended from working and studying as a form of punishment.

Part H will review the status of released individuals who were arrested throughout the protests.

INTRODUCTION

Protests were sparked by the death of Mahsa Amini on September 16, 2022, after the morality police arrested her. Indeed, this 22-year-old girl was detained by Tehran’s “morality police” on September 14. She was transferred to a hospital that same day in a state of coma and died on September 16. The police claimed that Mahsa Amini had a heart attack, but in an interview, Amini’s uncle called her heart disease a fabrication and confirmed Mahsa was completely healthy.

The publication of this news followed large-scale reactions. In addition to many social media users, well-known cultural, artistic, and sports figures also expressed their anger about what happened. After the death of Mahsa Amini, demonstrations started against the forced hijab laws in Azerbaijan. Medical students of Tabriz University protested against systematic gender inequality and the violence perpetrated by morality police against women. Tabriz University of Medical Sciences students protested against this violence by holding placards stating “Violence Against Women is Political” and “Take Your Hands off my Body,” written in Azerbaijani Turkish, their native tongue. At Tabriz University, several students and University professors have been summoned by the university’s security department. At least three students were expelled from Tabriz University because of participating in protests.

A few days later, the demonstrations began to evolve into a new level with radical demands. The termination of the Islamic republic was included among the demands of protestors. The protestors were chanting political slogans such as “Freedom, Justice, and National Government” on September 20, 2022. This is a famous slogan amongst the Azerbaijani protests in Tabriz, Urmia, Ardabil, Zanjan, and other Azerbaijani-populated cities.

Since the beginning of the protests, Iranian authorities have mobilized the riot police, Revolutionary Guards, the Basij paramilitary force, the Law Enforcement Command of the Islamic Republic of Iran, and plainclothes security agents to stifle demonstrations in Azerbaijan. A leaked document provides new details about the harsh methods the Iranian officials used to crack down on peaceful protestors. Iran’s highest military body instructed

the commanders of armed forces in all provinces to “severely confront” protestors. Following this order, there was a significant spike in the number of injured, arrested, and dead protestors. Up to the current report, the security forces have taken the lives of at least 458 people in Iran.

In November and December, Iran’s repressive machinery has been brutally working to crack down on the protests in the West Azerbaijan, East Azerbaijan, Ardabil, Zanjan, Arak, Qazvin, and Tehran provinces. The Iranian government uses every possible method to crack down on the protests. Because of this, massive human rights violations such as different forms of tortures, capital punishment, direct shootings at the protestors, and raping the protestors regardless of their gender, are reflected in various human rights reports.⁴ These crackdowns from September until December have left at least twenty-four identified victims shot dead by the security forces and hundreds of protestors injured in the Azerbaijan region of Iran. At least 6 Azerbaijani Turks have been sentenced to capital punishment.

On December 2, Milad Ashrafi was executed by the Islamic regime. Milad was from Tabriz, East Azerbaijan. He was arrested during the protests and accused of collaborating with Israel. A stereotypical accusation that the regime uses to justify the execution of political prisoners in Iran.

Amnesty International reported another young Azerbaijani Turk arrested over the protests, Sahand Noor Mohammadzadeh. He was sentenced to death in November on accusations of “attempting to close the street and preventing the movement of vehicles.”

ABOUT THIS REPORT

Generally, human rights organizations rarely reflect human rights violations in the border provinces of Iran, where the cultural, civil, and human rights of ethnic groups are continuously violated. The U.S. and Canada-based Azerbaijani human rights defenders utilized their networks with the Azerbaijani human rights defenders inside of Iran and prepared this report on the human rights status in West Azerbaijan, East Azerbaijan, Ardabil, Zanjan, and Qazvin provinces. Unfortunately, international human rights reporters mostly do not have adequate access to information from these regions' even though analysis of the latest news has shown that the government stifles non-Persian ethnicities harsher than Persians. In Azerbaijan, Balochistan, and Kurdistan, protestors have been brutally murdered by the Iranian government. Based on the collected evidence from eyewitnesses, victims' families, published information, and the protestors, the security and IRGC forces have deliberately used firearms to stifle protests. For instance, the "Baloch Activists Campaign,"⁵ based in the United Kingdom, has published the names of 96 protestors shot dead in Zahedan and announced that more than 300 people were injured due to gunshot wounds during a demonstration on September 30, 2022.

So far, Iran's authorities have rejected an independent investigation regarding this issue. Also, Iran's leaders have denied any crackdowns on protests. Demonstrations in Azerbaijan continue as this report is being published and information about the dead, injured, and arrested protestors is being collected through this network. This report has compiled most of the information about victims from the Azerbaijani Human rights defenders outside and inside Iran, eyewitnesses, victims' relatives, videos, and local news resources and journalists.

CLASSIFICATION OF THE COLLECTED INFORMATION ON HUMAN RIGHTS VIOLATIONS

Received footage from the protests and published reports from Iran indicate that protests in East Azerbaijan, Zanzan, Qazvin, Ardabil, Tehran, and West Azerbaijan are opposing the mandatory hijab, supporting women's rights, and standing up for ethnic rights and freedoms. The protestors chanted many slogans against the Islamic Republic's leadership, including its supreme leader. During these demonstrations, the government began to suppress these protestors with live ammunition. Numerous protestors have been arrested, injured, or shot dead by the security forces.

The majority of fatalities occurred due to being killed by live ammunition. Azerbaijani casualties cannot be readily identified in Tehran and other megacities with a sizable Azerbaijani population due to a lack of information about the victims. Nonetheless, some of them have been identified based on funeral recordings, family members' statements, human rights defenders' investigations, and victims' social media profiles. In the meantime, in certain instances, security authorities pressure victim' relatives to bury the dead outside the capital city, Tehran, such as their home towns. In these examples, the victims' origin can be determined. We can confirm the identities of twenty-four protestors who were killed. The following tables detail the victims of the protests

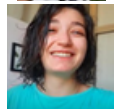

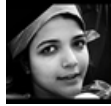

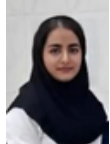

A. Murdered Individuals

Women and Children

The Iranian regime systemically discriminates against women, treating them as second-class citizens. This discrimination has been underpinned by Iran's constitution. Iran's constitution needs deep reforms and rewriting based on the demands of a modern society. Iran's constitution has been formed based on the Islamic/Shia religion and Persian culture. As a result, given the ethnic diversity in Iran, women's ethnic background also influences their social status and class. For instance, women with Azerbaijani Turk background are not equal to Persian women. This is due to the gender and ethnic discrimination that exists in Iran's legal system. Similarly, Baloch women suffer triple discrimination on the basis of gender, ethnicity, and religion given their Sunni background in a Shia based system.

Women and children are the main targets of the repressive regime in Iran. At least 44 children have been killed by the regime during the ongoing protests. At least 13 Azerbaijani Turk women and children were killed by the repressive forces in Iran. Amnesty International has announced that

“Children represent 14% of overall deaths of protesters and bystanders recorded by Amnesty International, which exceeds 300 since the protests erupted. Our investigations into killings by security forces continue and the number of those killed, including children, is believed to be higher.”

A day after the Tabriz demonstrations, Zanzan joined these protests on September 21, 2022. The gatherings of protestors in Zanzan started around 18:00 on Wednesday and gradually spread to other main districts of the city. With the increase in the number of those protesting, the police and security forces assaulted the citizens with batons, threw tear gas, and fired directly at the protestors with shotguns. Several citizens were injured due to the impact of metal bullets and batons. Police and security forces used many tools and various methods to end the protests. During the protests **Mehrdad Ghorbani** and **Mehdi Mousavi** were shot dead by the regime's forces on Wednesday, September 21, 2022. The local reports confirmed that Mehdi Mousavi, a minor, was killed as a result of five bullets, and numerous baton blows to his head and body. Also, Mehdi Mousavi was only 16 years old when he was killed.

According to local reports the authorities did not transfer Mehdi Mousavi's corpse to his family due to the pressure from intelligence agencies. The officers only allowed the family to attend his burial. Mehdi Mousavi's body was taken directly from the hospital to Behesht Zahra Cemetery in Zanzan and was buried without the presence of relatives and other citizens of Zanzan and only in the presence of a few members of his family.

The security agencies threatened Mehdi Mousavi's family that if they revealed that he was killed by the police officers of the Islamic Republic, they would also arrest and "eliminate" the other family members. At the same time, several people from Zanzan reported that three to five people were killed in the protests in this city. However, it is very challenging and we could not confirm the identities of the others killed.

According to the published information, 23-year-old **Hadis Najafi** suffered many injuries as a result of six bullets in her abdomen, neck, heart, and hand by the security forces in Karaj on September 21, 2022, and died after being transferred to Qaim Hospital in Karaj.

Videos and photos have shown that victims were hit and shot in their heads. Hadis Najafi was killed by fired war bullets. Her mother and sister said that when the security forces gave Hadis's corpse, they saw a bullet wound on her face. We could not confirm if she had prior activities regarding women rights, however, she posted videos on her Instagram and TikTok account dancing to the latest viral trend, including Turkish pop

music and Azerbaijani songs which show that she was against the mandatory hijab. On her very last Instagram story, she tells “I am going to the protests with excitement. A few years later I want to look back and feel happy that I attended the protests and everything has changed.”

Unfortunately, hijabs are mandatory in public for all women in Iran, regardless of religion or nationality. Hadis Najafi, 23, was part of the new generation in Azerbaijan. She was aware of women’s and national rights, such as Azerbaijani culture. She loved sharing fashion on her Instagram, styling her hair with and without her hijab with Turkish captions and bio. In her Instagram Bio, she wrote, “Fill my place now if there is another me” in Turkish. She was a TikToker shot dead while protesting for women’s rights and has become a symbol of Azerbaijani resistance.

One of the identified victims, **Sarina Esmailzadeh**, a 16-year-old female from Mehrshahr, Karaj was killed by the repressive forces of the Islamic Republic of Iran during these nationwide protests On September 21, 2022. According to local news and reports, this teenager’s mother could not bear her daughter’s death and committed suicide.

Esmail Heydari, 18 years old, from Qurt Tepe village in Meshginshahr city of Ardabil province, was killed on September 23. He lived alone in Motelgo in Nishtarud, Mazandaran, and worked in a bakery to send money to his parents in the village.

A bullet shot by the intelligence forces killed **Dr. Parisa Bahmani**. Parisa Bahmani was a general surgeon. She was shot to death on October 26 in a gathering of doctors in front of the Tehran Medical System building and was brutally attacked by Iranian security forces.

On October 31, **Nasim Sedghi**, a 22-year-old girl, was killed by security forces during the protests in Urmia- West Azerbaijan. Nasim Sedghi died in the demonstrations by direct fire from the security forces. Her family is under pressure from the security agencies to announce the cause of her death as an accident. Her body was buried on November 2 under strict security measures in Shahindej cemetery.

According to information from a local source in Azerbaijan, on October 16, **Nima Shafighdoost** was killed by a security force in Urmia. Nima Shafighdoost was arrested with a brutal beating. Although Nima was

bleeding in the police department, security forces did not immediately transfer him to the hospital, and they let him die. The nearest hospital is two minutes away from the police department where Nima died. The government has announced that Nima died due to a dog bite.

Another victim was **Asra Panahi** who died on October 14 after being beaten by the security forces in the Ardabil Province. Some other students of Shahid high school in Ardabil were also arrested for refusing to attend the government mandated march. Asra Panahi, a 15-year-old student, was killed by internal bleeding that she suffered as a result of the brutal beating.

19-year-old **Yalda Aghafazli Irdmosi** was arrested during the protests in Tehran and subjected to severe torture and beatings in Qarchak prison. Yalda Aghafazli Irdmosi, originally from Sarein-Ardabil province, lived in Tehran, and is said to have committed suicide. According to her family, she was a teenager full of joy and enthusiasm with no mental issues. A few days after her release, her suicide news was published. Her funeral was held on Saturday, November 21, in a tight security environment. Aghafazli's family has been forced to remain silent under threats by security forces.

Yalda Aghafazli Irdmosi's relatives say that she was arrested on November 4 and released on November 15. On Friday, November 20th, she committed suicide due to her trauma when she was in custody and as a result of the maltreatment and torture she went through. Yalda Aghafazli Irdmosi was under the pressure of security agents after her release and her communication was limited.

On November 16, **Aylar Haghi**, an Azerbaijani medical student from Malekan, East Azerbaijan, died in the protests in Tabriz, East Azerbaijan. Mahmoud Jafari, Aylar Haghi's uncle, stated in an audio file that Aylar Haghi's death was due to a direct bullet hit to the back of her head. The security forces did not hand over Aylar Haghi's body to her family for two days. So intelligence forces forced Aylar's family to state the scenario of a fall from a height and rebar sinking into his stomach. In a desperate attempt, the regime tried to convince Aylar Haghi's family to state the cause of their daughter's death as falling from a height as a suicide. Intelligence forces arrested Aylar Haghi's father after he resisted following the order.

The security forces handed over the body of this dead Azerbaijani woman under the condition that she must be quietly buried in Wadi Rahmat Cemetery, far from her hometown. According to the local sources and Aylar Haghi's father, her uncle was also arrested by the forces, and there is no information about his location.

Aylar Haghi's family in Tabriz is under pressure and all kinds of threats from the security forces of the Iranian regime. According to the human rights organization "ARCH," the regime deliberately placed security forces in the neighborhood leading to Mr. Haghi's house to make sure her family mourned quietly.

Arshia Imam Gholizadeh Alamdari, a 16-year-old teenager, was arrested for throwing a turban in Jolfa. He was detained for ten days and committed suicide two days after his release.

Arshia Imam Gholizadeh Alamdari, originally from Alamdar (Hadishahr), East Azerbaijan, and a resident of Rasht, had gone to his hometown to visit his relatives. There, security forces identified and summoned him for throwing a turban. Arshia's father refused to hand him over, and they returned to Rasht, but Arshia's family was forced to return to Alamdar due to repeated threats from the security forces. Arshia, after introducing himself to the judicial authorities, was first transferred to Alamdar Detention Center and then to Tabriz.

According to a local source, after being released, Arshaia Imam Gholizadeh Alamdari admitted that "every night they forced us to take pills." This Azerbaijani teenager suffered from severe depression after his temporary release because of the harsh behaviors he saw during his arrest. Eventually, he committed suicide and ended his life only a few days after returning from prison.

While he was in custody, according to the information from the police force, he was severely beaten. After his release, he went to a doctor to treat the wounds caused by the torture. According to the comments of the relatives of Arshia Imam Gholizadeh, the pressure on him during his arrest and the physical and psychological trauma caused by the torture

led him to commit suicide. There has not been any official explanation about the medicine that was given to Arshia. This is a crime that happens frequently in Iran's prisons which requires a full investigation.

On December 7, **Hasti Hasanpour** – a 16-year-old student – was killed by security forces in Tabriz - East Azerbaijan.

She was a Shakiba Girls' School student in Andisheh when she returned from school in the Andisheh neighborhood; the repressive forces brutally attacked her because she did not have a hair scarf and resisted being kidnapped. She lost her life due to a beating. Her body was secretly buried under security measures. The family of this child is under the most intense pressure.

On September 22, **Javad Heydari** was shot near the Mellat Park and died after a few hours due to the severity of his injuries and lack of medical attention. Javad Heydari was the first victim of the protests in Qazvin who has been identified. He was hit by ammunition from a close range and died after a few hours due to heavy bleeding. According to the information given to the family by the intelligence forces, he was shot near the hip and the bullet passed through his body. This means that the bullet hit him from a very close distance from the back and it exited from the other side of his body.

The intelligence forces told Javad Heydari's family that Javad Heydari should be buried right away; otherwise, they (the security forces) would bury him wherever they wanted. The intelligence forces even sent a message through an intermediary that they should announce that Javad Heydari died due to an accident. Still, his family members ignored the threats and said: "One of us has gone. There is no fear of losing the others too." The presence, support, and company of many people helped reduce the pressure. There was a grand funeral with a large number of people supporting this family.

Mohammad Jameh Bozorg, a citizen, born in Tuserkan-Hamedan and a resident of Karaj, was killed in the middle of the night in his home by direct fire from the security forces On September 25. The agents killed Mohammad Jameh Bozurg in front of his Family's eyes for sheltering the protesters.

According to the burial permit, the cause of death of Mohammad Jameh Bozorg is the disintegration of the skull as a result of being hit by a high-speed projectile (bullet). His Family has filed a case against the repressive forces in a military court. The repressive forces said that they had nothing to say in defense. They only ordered that there is a person named Mohammad in this place who shelters the protestors, and we dealt with him.

Mohammad Jameh Bozorg's brother informed that the security forces intervened in his brother's case and said that after forty days after his brother's death, justice had not been served to his brother.

On October 8, **Mohsen Mousavi**, an Azerbaijani citizen originally from the

city of Tarim-Zanjan, was killed by the security forces of the Islamic Republic of Iran. Mohsen Mousavi, 30, was killed in Tehran's bazaar on Saturday, October 8, due to severe blows from a baton to the head. The security officials prevented him from being buried in Tehran and said he should be buried in a distant city. Mohsen Mousavi's family took Mohsen's body to his hometown of Tarem, and he was buried there.

On October 22, **Sina-Malayeri**, a 38-year-old young man from Arak, was killed by the security forces during the protests.

Reza Esmailzadeh, a senior student in Sharif University of Technology, was killed by a direct shot to his face. His body was handed over to his family in Chaldoran. He was shot during the Sharif university protests when the police interfered. He was buried on October 25, in West Azerbaijan-Chaldoran cemetery.

Morteza Shir Mohammadi, a young Azerbaijani Turk from Sain Ghala (Shahin Dej), a Tabriz Medical Sciences student, was shot dead by the Iranian security agents during the protests in Tabriz. On November 2, security agents handed over the body of this Azerbaijani student to his family. According to his relatives, the agents only stated that "he died during the demonstration."

According to local sources, the father of this Azerbaijani student, Ali Asghar Shir Mohammadi, is the head of the political strategy office of the IRGC in Urmia. His father refuses to cover the news of his son's death during anti-government demonstrations due to his government affiliations.

The funeral ceremony of Morteza Shir Mohammadi was on Wednesday, November 2, in his hometown, "Kholot" village, Sain Ghala, West Azerbaijan.

On November 15, **Sepehr Ismaili** from Qazvin was killed by a direct shot to his heart on the morning of his birthday. He was killed by a bullet shot by the Basij forces near a police station in Kiashahr, Gilan province. The funeral ceremony for his body was held secretly due to security pressures. There have been protests at the funerals of the murdered individuals. The family was forced to have a funeral at 6 am on November 25 to avoid any further protests.

On November 15, **Ali Araghi** was killed by the security forces with a direct shot in Tabriz, East Azerbaijan province. According to the Iranian news agencies, Ali Araghi fell from his residence in the Baghmisheh neighborhood of Tabriz. However, according to his relatives, Ali's father's home is on Faraz Street and not Baghimesh as mentioned. Moreover, the person shown as Ali's father in an interview by the state controlled news agency has been shown to be false. This person was not in fact his father.

On November 18, **Hamidreza Rouhi** was killed by the direct shooting of security forces in Tehran. IRGC-affiliated news agencies tried to introduce him as a "Basij" member. However, his friends published footage on social media that showed Hamidreza Rouhi chanting slogans and confronting the security forces. Hamidreza was a student at the Azad University of Qods city-Tehran. He died from a shooting by the Iranian forces in the Shahreziba neighborhood in Tehran.

On November 24, retired Azerbaijani teacher **Rasul Haddadi** died after about two months in a coma after being shot by the security forces. Rasoul Haddadi from Zanzan was in a state of coma due to gunshots and severe blows to the neck. The security agents kidnapped him when he was in coma from the hospital in Zanzan and took him to Tehran. He died after 50 days on November 24. It is said that the security forces secretly took his body out of the Khomeini Hospital in Tehran and buried it secretly in Zanzan.

Human rights defenders indicate that Rasoul Haddadi, a retired teacher living in Zanzan, suffered brain death due to a gunshot wound to his neck on Wednesday, October 26, while a rally was held in Zanzan city on the occasion of the 40th anniversary of Mahsa Amini's murder. He was admitted to the ICU department of Mousavi Zanzan Hospital.

Since that date, this 66- year- old citizen was under strict security measures, and his family was not informed of his condition. Rasul Haddadi's family did not have access to his medical file and the meeting was conducted with the significant presence of security officers to avoid taking photos.

It is reported that the security agent pressure his family that Rasul Haddadi should be taken to Tehran. Security forces thought that after Rasul Haddadi's death, if he were buried in Tehran, this would prevent the gathering of protestors in Zanzan. After Rasul Haddadi's refused to sign an order form, the security forces announced that they would receive an order from the prosecutor to Transfer Rasul Haddadi to Tehran. In that case, security forces would not need the family's consent.

B. Protestors Sentenced to Capital Punishment

According to Amnesty International, 26 people in Iran are at risk of execution. The regime uses capital punishment to spread a sense of fear in the population. At least six Azerbaijani Turks have been sentenced to capital punishment. In most cases, these victims do not have access to a lawyer. Arrests of people sentenced to execution have been accompanied by severe torture in prisons or solitary cells.

According to the Human Rights Society, Mr. Theo Francken, a member of the Belgian Parliament, has taken political sponsorship of Hojjat Mirazi. Francken announced on his Twitter account:

On December 2, **Milad Ashrafi** was executed by the regime of the Islamic Republic. Milad was from Tabriz, Bostan Abad, Atbatan village. He was arrested in the protests and accused of collaborating with Israel.

C. Sentenced Azerbaijani Lawyers

Increasing security pressure and judicial condemnation of Azerbaijani lawyers

Since peaceful demonstrations began in September 2020 against the Islamic Republic of Iran, the security pressures against Azerbaijani lawyers have increased unprecedentedly as they were accepting to represent the arrestees and provide legal support. During this period, at least four lawyers have been sentenced to prison. Additionally, several lawyer's had their licenses revoked.

Due to the mentioned circumstances, **Omid Rahmani Sedigh Azar** resigned from his position as the police prosecutor of the East Azerbaijan Bar Association. Sina Yousefi, the head of the human rights commission of the East Azerbaijan Bar Association, who was previously arrested by the security forces of the Islamic Republic of Iran, stated in his Twitter page that the reason for this resignation was the pressure of the security institutions on the lawyers to revoke the license of more than 50 of the association's members.

The names of more than 50 lawyers were sent to the East Azerbaijan Center by the intelligence ministry to be dealt with administratively such as by suspending or revoking their license. However, Omid Rahmani Sedigh Azar did not comply with these unjust orders and was forced to resign.

Sina Yousefi was also informed about a large number of referrals to the legal offices. He said, "The volume of referrals to the offices of my colleagues and the lawyers' association was too high to be accepted. Due to the high number of detainees from the protests, the Human Rights Commission decided to form a Defense Committee. However, the government attacked me for performing this professional duty and adhering to the lawyer's oath. I have faced another charge under the accusation of forming an illegal group."

While he does not have the conditions to endure imprisonment due to his old age and chronic prostate disease, this 76-year-old Azerbaijani activist

has informed his family and relatives that he has been transferred from Wing 16 to Wing 1 of Ardabil Central Prison.

Wing 1 of Ardabil Central Prison is a wing for general and dangerous criminals. Thus, civil activists and his relatives have been emphasizing this issue. Azerbaijani human rights activists are worried about his physical health and want his quick release.

Laws related to the separation and treatment of detainees have not been observed in Iran's prisons for many years, and the prison authorities, on the order of security forces, transfer the Azerbaijani activists imprisoned in Iran's prisons to general and dangerous criminals wings under different excuses.

THE IRANIAN GOVERNMENT'S APPROACH TO THE PROTESTS

Despite much published information from the victims' families, eyewitnesses, human rights defenders inside and outside Iran, as well as International human rights organizations about the killings of people during the ongoing demonstrations, Iran has denied the murder of protestors and has not taken any responsibility. The Iranian government will not accept the truth that security forces unlawfully killed protestors. Analysis has shown that in most cases, death was preventable.

The eighty-three years old supreme leader, Khamenei, has smeared the protestors as "rioters" and "enemies of the people." He says, "I say explicitly that these riots and this insecurity were designed by the U.S. and the occupying, fake Zionist regime [Israel] and those who they pay, and some traitorous Iranians abroad helped them," in his speech on October 3, 2022.

On September 23, 2022, Ahmad Vahidi, Iran's Minister of Interior, made statements about the people killed during the protests. He said, "People from the west and northwest of Iran were active anti-Islamic Republic groups." He has not clarified which anti-Islamic Republic groups are active in Azerbaijan. Azerbaijani Turkic minorities populate provinces in the northwest and west of Iran. Although there is no evidence that the demonstrators attempted to enter the police station forcefully, security forces fired live ammunition repeatedly and killed several people in Azerbaijan.

The Supreme Leader of Iran and Iran's Minister of Interior called protestors "rioters," "enemies of the people," and "anti-Islamic Republic groups." They did it to crack down upon protestors and refuse any responsibility against victims. On the other hand, the government pressures victims' families to announce that the dead protestors have died in accidents or from health conditions such as heart failure. In the case of Asra Panahi, the government threatened Asra's family to announce that their daughter had died because of an underlying disease. In the case of Nima Shafighdoost, the Commander of the police force of Urmia reported that Nima died because of a dog bite. The government has attempted all actions not to take responsibility.

CONCLUSION AND RECOMMENDATIONS

The regime has used various torture methods such as rape of men and women, forced confession, and heavy weapons to quell protests. The regime uses forced confessions to sentence arrested people to capital punishment. Forced confession is considered a form of torture that makes any given statement invalid. A person's fundamental rights as a human being and a prisoner are taken away. In this way, security forces and interrogators of the Islamic Republic have used the same methods of torture, pressure and abuse for different people to achieve their goals.

Activists warn that Iran has been planning to use capital punishment to stifle the protests by spreading fear in the population. Due to the high number of arrested people during the demonstrations, the number of people who will be sentenced to death is expected to increase.

We are deeply concerned that without significant pressure from the international communities and organizations and a lack of proper actions, the lives of the protestors including women and children are at grave risk.
